POSTGRADUATE MEDICAL JOURNAL

VOLUME 62

January to December 1986

Published for
The Fellowship of Postgraduate Medicine
by The Macmillan Press Ltd

Subject Index

*denotes case report

Abdomen
acute, surgery in adults with leukaemia. *October*, **915**
injured, assessment and management. *March*, **155**
surgery, emergency. *June*, **427**
Acetabular fracture of pelvis: diagnostic images. *May*, **381**
*Achalasia, and recurrent sub-mucosal dissection of the oesophagus. *October*, **955**
*Actinomycosis, causing unilateral thyroid swelling. *September*, **847**
Adenomas, haemorrhage into, and pituitary apoplexy. *July*, **623**
*Agranulocytosis, reversible, and meprobamate. *June*, **499**
Alcohol
and blood pressure, social comparison, Zimbabwe. *November*, **1011**
education for doctors: leading article, *November*, **983**
*Alopecia, total, steroid responsive, sarcoidosis as cause. *March*, **205**
Alpha and beta blockade combined, in management of ventricular arrhythmias in mitral valve prolapse. *April*, **259**
Aluminium phosphide poisoning, prospective study of 16 cases in one year. *December*, **1113**
Amantidine, successful treatment of neuroleptic malignant syndrome: correspondence. *August*, **809**
Amiodarone and thyroid hormone metabolism: review article. *October*, **909**
Amyloidosis
Portuguese, heart in. *June*, **601**
primary, destructive bone lesions in. *November*, **1037**
*Aneurysm, hepatic artery, treated by proximal ligation. *October*, **957**
*Anorexia nervosa, and pancreatic ascites. *December*, **1151**
Anticardiolipin antibodies, clinical associations: review article. *December*, **1081**
*Anticholinergic-induced analgesia, possible role for cholinergic system in abnormal sensory symptoms in Parkinson's disease. *August*, **749**
Appendicitis, review of surgical treatment. *June*, **427**
Arthythmias
in dilated cardiomyopathy. *June*, **593**
relationship to walking activity during mobilization after myocardial infarction. *April*, **255**
*Arteriovenous fistulae, bilateral pulmonary, treated with balloon embolization. *March*, **209**
Arthritis, juvenile chronic, clinical sub-groups with particular relationship to adult patterns of disease: review article. *September*, **821**
*Ascites, pancreatic, in hereditary pancreatitis. *September*, **873**
Associations of Physicians, US and UK, joint meeting, conference report. *November*, **1065**
*Asthma
acute severe, life-threatening, extracorporeal membrane oxygenation as emergency treatment. *September*, **855**
severe, management: correspondence. *January*, **69**
Atenolol, effect on muscle blood flow. *September*, **841**
*Azathioprine shock. *July*, **677**

Barium meal examination, general practice and teaching hospital use, City and Hackney Health District. *April*, **273**
*Basement membranes, dermal, and collagen fibrils, in X-linked spondyloepiphyseal dysplasia tarda, previously unreported abnormalities. *October*, **943**
*Behçet's disease
complicated by pneumonectomy in pulmonary mucormycosis. *June*, **485**
presenting as benign intracranial hypertension, *January*, **39**
oculomucocutaneous syndrome mimicking, and chronic granulomatous disease. *June*, **491**
*Bell's palsy and bilateral brachial neuritis, in infectious mononucleosis. *December*, **1129**
*Benign intracranial hypertension, Behçet's disease presenting as, *January*, **39**
Bereavement, heart disease mortality following, OPCS longitudinal study (abstract). *August*, **789**
Beta-adrenoceptor
antagonist treatment, sympathetic stimulation aggravated by, and blood pressure surges, possible association, theory. *August*, **731**
blocker, long acting, effect on diurnal variation of cardiac dysrhythmias. *March*, **175**
effect on muscle blood flow. *September*, **841**
Biliary tract, review of surgery. *June*, **430**
*Bisalbuminaemia, in pancreatic ascites, *January*, **43**
*Bisphosphonate treatment correcting hypercalcaemia due to sarcoidosis. *October*, **937**
Bladder
spontaneous rupture, and cor pulmonale presenting as acute abdominal emergency: correspondence. *July*, **702**
stone, uric acid, associated with a foreign body. *June*, **495**
Blood pressure
and alcohol, social comparison, Zimbabwe. *November*, **1011**
surges possibly associated with sympathetic stimulation aggravated by β-adrenoceptor antagonist treatment, theory. *August*, **731**
Bowel tumour: diagnostic images. *April*, **281**
Breast
abscess, post-menopausal. *November*, **1017**
carcinoma, review of treatment. *June*, **436**
Bromocriptine, dopamine and glaucoma: leading article. *September*, **819**
*Bronchus, carcinoma, and minimal change nephropathy. *March*, **213**
*Bulimia nervosa, and profound folate deficiency. *September*, **853**
*Bullous pemphigoid, mefenamic acid-induced, *January*, **67**

Calcium antagonists, and chronic cardiac failure: review article. *August*, **713**
Calculi, urinary, review of treatment. *June*, **434**
Campylobacter enterocolitis, general and surgical aspects: review article. *August*, **719**
*Carbamazepine
and dextropropoxyphene, interaction between. *March*, **231**
for epilepsy aggravating sick sinus syndrome. *June*, **497**
*Carcinoma, primary, in a giant lateral thyroglossal cyst. *September*, **849**
Cardiac
failure, chronic, and calcium antagonists: review article. *August*, **713**
function tests, serial, in myocarditis. *June*, **577**
Cardiomyopathies
the message for the 1980s. Articles based on papers presented at the International Symposium, Lisbon, Portugal, October 1984. *June*, **511–613**
the message for the 1980s, part II: editorial. *June*, **513**
Cardiovascular
disease, influence of social relationships on aging and development, a review. *August*, **805**
morbidity or mortality and unemployment. *August*, **801**
Career
chaos: scenes from postgraduate life. *March*, **237**
problems, medical staff, NHS, scenes from postgraduate life. *December*, **1157**
Cefotaxime therapy, erythema multiforme following: correspondence. *May*, **415**
Centres for education: scenes from postgraduate life. *May*, **413**
*Cerebral
aneurysm, rupture, associated with nifedipine treatment. *November*, **1029**
malaria, and hypoglycaemia. *May*, **401**
palsy, familial, associated with normal intelligence. *September*, **827**
*Chickenpox, complicated by pericarditis with pericardial effusion. *December*, **1133**
Child health, training, for developing world. *February*, **147**
Childhood prevention of coronary heart disease. *February*, **97**
Chlamydia psittaci* infection, and subacute thyroiditis, *January*, **33
Chlamydia trachomatis* pneumonia, complicating T-cell lymphoblastic lymphoma of uterus, *January*, **55
Chlamydial infections in man: review article. *April*, **249**
*Choristoma, osseous, presenting as a cold solitary thyroid nodule. *November*, **1035**
Chromosomal defects of clinical importance recently recognized. *February*, **131**
Cimetidine, in duodenal ulcer, low dose maintenance treatment, intermediate-term results. *May*, **347**
*Clostridial myonecrosis, in association with etoposide therapy, presenting as severe thigh pain. *May*, **403**
*Coeliac disease, and fatal pneumococcal septicaemia. *March*, **229**
*Colitis
caused by non-steroidal anti-inflammatory drugs. *August*, **773**
inflammatory, colorectal lymphoma simulating, diagnosed by immunohistochemistry, *January*, **51**
*Collagen fibrils and dermal basement membranes, in X-linked spondyloepiphyseal dysplasia tarda, previously unreported abnormalities. *October*, **943**
*Colon carcinoma, intraluminal mucus cast complicating. *November*, **1061**
*Colonoscopy, role in intussusception in intestinal lymphoma. *December*, **1139**
Colorectal
carcinoma, recurrent disease. *June*, **433**
review. *June*, **432**
lymphoma: review article. *July*, **615**
simulating inflammatory colitis and diagnosed by immunohistochemistry, *January*, **51**
*Common bile duct, granular cell tumour. *October*, **961**
*Complement system, C1 esterase inhibitor deficiency, in X-linked hypogammaglobulinaemia following intramuscular gammaglobulin administration. *October*, **939**
*Computerized tomography of abdominal wall, use in diagnosis of partial post-operative wound dehiscence. *October*, **947**
Congestive heart failure, chronic, appropriateness of inotropic therapy, evaluation of digitalis. *June*, **585**
Consultants, mobile: scenes from postgraduate life. *August*, **777**
Coronary
heart disease, association by stress. *July*, **683**
childhood prevention. *February*, **97**
mechanism of stress. *July*, **695**
stress leading to, mechanisms. *July*, **687**
reperfusion, spontaneous, in myocardial infarction, prediction. *November*, **1007**
Correction. *May*, **422**
Cost benefit analysis and health care resources. *December*, **1107**
*Cranial irradiation, meningioma following. *August*, **741**
*Creatine kinase levels, elevated, and focal myositis, in phaeochromocytoma. *March*, **197**
*Crohn's
colitis and sarcoidosis. *October*, **951**
disease, long latent period. *May*, **353**
and male fertility. *April*, **269**
in monozygotic twins. *November*, **1047**
*Cryofibrinogenaemia and acute gangrene, in systemic sclerosis. *October*, **935**
*Cushing's
disease in the elderly, successful control with long term metyrapone. *August*, **727**
syndrome, as transitory immune deficiency state. *July*, **657**
Cyst, multilocular, kidney. *September*, **877**
*Cysticercosis, and generalized muscular pseudo-hypertrophy. *April*, **299**

*Deafness, sensorineural, new complication of ulcerative colitis. *August*, **753**
*Deiodinase deficiency causing familial goitre, and evolution of hypothyroidism, report of a family and review of literature. *June*, **477**
*Dental infection, as cause of pyrexia of unknown origin, two case reports. *October*, **949**
Depression, biological, and sleep: hypothesis. *March*, **179**
Developing world, training in child health. *February*, **147**

*Dextropropoxyphene and carbamazepine, interaction between. *March*, **231**
*Diabetes mellitus
and group B streptococcal meningitis. *October*, **933**
and chronic liver disease, development in long term chelated β-thalassaemia. *September*, **831**
thyrotoxic induced impaired control, and thyroid metastatic follicular carcinoma. *March*, **199**
type II, impaired thyrotrophin secretion following administration of thyrotrophin-releasing hormone. *June*, **445**
serum uric acid and serum glucose, relationships in a population study. *November*, **1001**
with chronic lymphatic leukaemia, and persistent local insulin allergy. *September*, **865**
*Diaphragm, 'spontaneous' rupture. *May*, **389**
Diaphragmatic hernia, diagnostic challenge: leading article. *May*, **325**:correspondence. *November*, **1067**
*Diclofenac-induced hepatotoxicity, 2 cases, *January*, **63**
*DIDMOAD syndrome with megacystis and megaureter. *September*, **859**
Digitalis, in chronic congestive heart failure, evaluation. *June*, **585**
Digoxin, sodium excretion and blood pressure. *April*, **265**
Dilated cardiomyopathy
and arrhythmias. *June*, **593**
vasodilator therapy. *June*, **599**
District general hospitals, size and staffing: scenes from postgraduate life. *July*, **679**
Diuretics
fixed combination, plasma electrolytes in elderly patients. *March*, **159**
induced hyponatraemia, significance of measurement of uric acid fractional clearance. *June*, **449**
Diverticulosis, review. *June*, **431**
Dopamine, bromocriptine and glaucoma: leading article. *September*, **819**
Duodenal ulcer
low dose maintenance treatment with cimetidine, intermediate-term results. *May*, **347**
twice daily tripotassium dicitrato bismuthate in treatment. *January*, **19**
*Duodenum, third part, obstruction, in tuberculosis. *September*, **879**
*Dysarthria and visual hallucinations due to flecainide toxicity. *January*, **61**
Dysrhythmias, cardiac, diurnal variation, effect of long acting beta-adrenoceptor blocker. *March*, **175**

Echocardiography
assessment of hypertrophic cardiomyopathy. *June*, **557**
mitral valve in hypertrophic cardiomyopathy. *June*, **563**
Editorial. *June*, **425**
Education, continuing: scenes from postgraduate life. *June*, **501**
Elderly and hypertension, treatment: leading article, *January*, **1**
Electrolytes, plasma, in elderly patients taking fixed combination diuretics. *March*, **159**
*Embolization, balloon, for treatment of bilateral pulmonary arteriovenous fistulae. *March*, **209**
*Enalapril, in successful treatment of scleroderma renal crisis. *November*, **1059**
Encephalopathy
hepatic, detection. *March*, **163**
in renovascular hypertension, associated with oral contraceptives. *November*, **1031**
Endomyocardial disease, eosinophilic, eosinophils in. *June*, **609**
Endorphin system, and Wernicke-Korsakoff encephalopathy: correspondence. *April*, **315**
Eosinophilia, blood, and ulcerative colitis, influence of ethnic origin. *December*, **1101**
Eosinophils, in eosinophilic endomyocardial disease. *June*, **609**
*Epidural
haematoma, spontaneous spinal, with spontaneous resolution. *September*, **885**
injection, causing nodular fasciitis. *September*, **881**
spinal cord compression, malignant, gait ataxia as presenting symptom. *August*, **745**
Erratum. *June*, **508**
Erythema
multiforme, following cefotaxime therapy: correspondence. *May*, **415**
nodosum, and yersinia arthritis. *May*, **405**
*Etoposide therapy, and clostridial myonecrosis, presenting as severe thigh pain. *May*, **403**
European Working Party on high blood pressure in the elderly (EWPHE), glucose intolerance during diuretic therapy in elderly hypertensive patients. *October*, **919**

*Fabry's disease, short PR intervals and tachyarrhythmias. *April*, **285**: correspondence. *October*, **969**
Facial swelling sensation in temporal arteritis, predictor for development of visual disturbance. *November*, **1019**
*Fansidar therapy, and transient lupus anticoagulant. *September*, **893**
*Fasciitis, nodular, induced by epidural injection. *September*, **881**
Feeding, infant, third world. *February*, **93**
*Femoral
hernia, causing pneumoperitoneum. *July*, **675**
vein occlusion, following Mc-Vay repair. *April*, **301**
Fertility, male, in Crohn's disease. *April*, **269**
*Fibrosis, myocardial hypertrophy and infarction following exposure of heart to radiation for Hodgkin's disease. *November*, **1055**
Flecainide
acetate, evaluation of efficacy in treatment of ventricular premature contractions: correspondence. *January*, **70**
toxicity, causing dysarthria and visual hallucinations, *January*, **61**
*Folate deficiency, profound, and bulimia nervosa. *September*, **853**
Food poisoning, *Salmonella virchow*, meningism following. *July*, **621**
*Foreign body, and uric acid bladder stone. *June*, **495**
Foreign exchange: scenes from postgraduate life. *April*, **311**

*Gait ataxia, as presenting symptom of malignant epidural spinal cord compression. *August*, **745**
*Gall bladder
primary carcinoma, associated with ulcerative colitis. *September*, **871**

septum, clinical implications and treatment, *June*, **453**
*Gangrene, acute, and cryofibrinogenaemia, in systemic sclerosis. *October*, **935**
*Gastric carcinoma, and hypoglycaemic coma. *August*, **761**
Gastroenterology, paediatric, lessons of inborn errors. *February*, **101**
*Gastrointestinal
bleeding, due to large bowel infiltration by chronic lymphocytic leukaemia, *January*, **45**
tract, non-steroidal anti-inflammatory agents: at our mother's knee – an occasional review, *January*, **23**
Glaucoma, bromocriptine and dopamine: leading article. *September*, **819**
Glomerulonephritis
acute crescentic, developing during warfarin therapy: correspondence. *December*, **1159**
association with non-Hodgkin's lymphoma. *December*, **1141**
Glomus tumour of the hallux, diagnosis by Doppler-shift ultrasound and digital subtraction angiography: diagnostic images. *July*, **647**
Glucose
blood, and glycosylated haemoglobin, in prognosis of stroke, *January*, **7**
intolerance during diuretic therapy in elderly hypertensive patients, second report from European Working Party on high blood pressure in the elderly (EWPHE). *October*, **919**
serum, serum uric acid and diabetes, relationships in a population study. *November*, **1001**
Glyceryl trinitrate, in objective relief of vasospasm, in secondary Raynaud's phenomenon, *January*, **15**
Glycosylated haemoglobin, and blood glucose, in prognosis of stroke, *January*, **7**
*Goitre
familial, due to deiodinase deficiency, evolution of hypothyroidism, report of a family and review of literature. *June*, **477**
and neurofibroma: diagnostic images. *June*, **463**
*Gonococcal tysonitis, case report, treatment with oral tetracycline. *September*, **869**
*Granular cell tumour, common bile duct. *October*, **961**
*Granulomatous disease, chronic, presenting as an oculomucocutaneous syndrome mimicking Behçet's syndrome. *June*, **489**
*Graves' disease,
asymptomatic, during lithium therapy. *April*, **295**: correspondence. *December*, **1159**
heart failure in sinus rhythm as sole manifestation. *November*, **1051**
*Greenfield filter, insertion into inferior vena cava above renal thrombosis site. *March*, **223**
*Group B streptococcal meningitis, in diabetic adult. *October*, **933**

*Haemaccel, skin necrosis following. *September*, **889**
Haematemesis, management, room for improvement: leading article. *October*, **907**
Haemoperitoneum, fatal, of hepatic origin. *December*, **1097**
Haemorrhage
into adenomas, and pituitary apoplexy. *July*, **623**
intraperitoneal, fatal, of hepatic origin. *December*, **1097**
*Hallucinations, visual, and dysarthria, due to flecainide toxicity, *January*, **61**
Health care resources, cost benefit analysis. *December*, **1107**
Heart
attacks, stress as a cause. *July*, **683**
disease morbidity or mortality, detection of effect of unemployment. *August*, **801**
mortality following bereavement, OPCS longitudinal study (abstract). *August*, **789**
failure in sinus rhythm as sole manifestation of Graves' disease. *November*, **1051**
*Hepatic
artery aneurysm treated by proximal ligation. *October*, **957**
encephalopathy, detection. *March*, **163**
failure, fulminant, primary hepatocellular carcinoma presenting as. *December*, **1135**
*Hepatitis A infection, and acute pancreatitis. *May*, **407**
*Hepatocellular carcinoma, primary, presenting as fulminant hepatic failure in a young woman. *December*, **1135**
*Hepatotoxicity, diclofenac-induced, 2 cases. *January*, **63**
Hernia, diaphragmatic, diagnostic challenge: leading article. *May*, **325**
High-achieving child. *February*, **143**
*Hodgkin's disease
in adult with acute lymphoblastic leukaemia. *June*, **487**
radiation for, myocardial hypertrophy, fibrosis and infarction following exposure of heart. *November*, **1055**
Hospitals
approving, for senior house officer and registrar grade jobs. *November*, **1063**
medical staffing, career prospects. *December*, **1157**
Hydatid disease, radiological appearances, Wales. *March*, **167**
*Hypercalcaemia
in chronic lymphatic leukaemia. *May*, **393**
due to sarcoidosis, corrected with bisphosphonate treatment. *October*, **937**
familial, acute vitamin D intoxication as cause. *November*, **1025**
immobilization, due to low bone formation, responding to intravenous sodium sulphate. *May*, **395**
recurrent, in young men with mono-ostotic Paget's disease. *June*, **481**
Hypernatraemia and hypothermia, following subarachnoid haemorrhage. *June*, **467**
*Hypertension
benign intracranial, Behçet's disease presenting as, *January*, **39**
in the elderly, treatment: leading article, *January*, **1**
fifteen year survival, drug treatment, follow up. *May*, **335**
glucose intolerance, diuretic therapy, elderly. *October*, **919**
renovascular, encephalopathy in, associated with oral contraceptives. *November*, **1031**
stress mechanisms. *July*, **697**
with thiazide-induced hypokalaemia, and transient atrial fibrillation. *December*, **1125**
Hyperthyroidism, iodine-induced, in patient with normal thyroid gland. *July*, **661**
Hypertrophic cardiomyopathy
mitral valve in, echocardiographic approach. *June*, **563**

muscle dynamics. *June*, **545**
pathology. *June*, **575**
pathophysiology, significance of obstruction. *June*, **515**
phonoechocardiography and intracardiac phonocardiography. *June*, **537**
radionuclide assessment of left ventricular function. *June*, **553**
role of echocardiography in assessment. *June*, **557**
surgical treatment (Düsseldorf experience). *June*, **571**
evidence for true obstruction to left ventricular flow. *June*, **531**
Hypertrophy, asymmetric apical, ten years experience. *June*, **567**
*Hypogammaglobulinaemia, X-linked, following intramuscular gammaglobulin administration, C1 esterase inhibitor deficiency. *October*, **939**
*Hypoglycaemia and cerebral malaria. *May*, **401**
*Hypoglycaemic coma, associated with gastric carcinoma. *August*, **761**
Hypokalaemia
record linkage study, in hospitalized patients: hospital practice. *March*, **187**
thiazide-induced, and hypertension, transient atrial fibrillation in. *December*, **1125**
Hyponatraemia, diuretic induced, significance of measurement of uric acid fractional clearance. *June*, **449**
*Hypothermia
following subarachnoid haemorrhage. *June*, **467**
idiopathic periodic, and bizarre behaviour in the presence of occult syringomyelia. *April*, **289**
*Hypothyroidism
evolution in familial goitre due to deiodinase deficiency, report of family and review of literature. *June*, **477**
primary, with paradoxically elevated plasma thyroxine due to thyroxine-binding antibody. *September*, **845**
thyrotrophin augmentation after commencing thyroxine replacement, *January*, **11**
*Hypouricaemia, renal, in 48, XXYY syndrome. *March*, **219**

Iatrogenic disease, lipoid pneumonia and liver angiosarcoma: diagnostic images. *March*, **193**
*Ileal
conduit, transitional cell carcinoma. *August*, **769**
stricturing, after long-term indomethacin treatment. *October*, **967**
*Ileosigmoid, case report, *January*, **47**
*Immunohistochemistry, diagnosing colorectal lymphoma simulating inflammatory colitis, *January*, **51**
Inborn errors
and paediatric gastroenterology. *February*, **101**
teratogenic, of metabolism. *February*, **125**
Indium-111 leucocyte scintigraphy, in investigation and management of inflammatory bowel disease. *June*, **457**
*Indomethacin treatment, long-term, ileal stricturing after. *October*, **967**
Infant feeding, third world. *February*, **93**
*Infarction, myocardial hypertrophy and fibrosis, following exposure of heart to radiation for Hodgkin's disease. *November*, **1055**
*Infectious mononucleosis, combination of cranial and peripheral nerve palsies in. *December*, **1179**
Inflammatory bowel disease
indium-111 leucocyte scintigraphy in investigation and management. *June*, **457**
review. *June*, **432**
Inotropic therapy, appropriateness for patients with chronic congestive heart failure, evaluation of digitalis. *June*, **585**
*Insulin
allergy, persistent local, in diabetic with chronic lymphatic leukaemia. *September*, **865**
oedema. *July*, **665**
*Internal carotid artery occlusion, in mitral valve prolapse. *December*, **1121**
*Intraluminal mucus cast complicating colon carcinoma. *November*, **1061**
Intraperitoneal haemorrhage, fatal, of hepatic origin. *December*, **1097**
Intravenous urography prior to prostatectomy. *December*, **1117**
Intussusception
in intestinal lymphoma, role of colonoscopy. *December*, **1139**
small bowel, multiple myelomatosis as unusual cause. *November*, **1043**
*Irradiation, heart, for Hodgkin's disease, followed by myocardial hypertrophy, fibrosis and infarction. *November*, **1055**

Juvenile chronic arthritis, clinical sub-groups with particular relationship to adult patterns of disease: review article. *September*, **821**

Labetalol, effect on muscle blood flow. *September*, **841**
*Lactic acidosis and small cell carcinoma of the lung. *April*, **297**
*Large bowel infiltration by chronic lymphocytic anaemia, causing gastrointestinal bleeding. *January*, **45**
*Leukaemia
acute lymphoblastic, and Hodgkin's disease. *June*, **487**
acute myeloblastic, associated with solitary plasmacytoma of the ilium. *December*, **1131**
acute myeloid, incomplete Reiter's syndrome following chemotherapy. *November*, **1045**
in adults, and surgery for acute abdomen. *October*, **915**
chronic lymphatic, and hypercalcaemia. *May*, **393**
in a diabetic, and persistent local insulin allergy. *September*, **865**
chronic lymphocytic, large bowel infiltration, causing gastrointestinal bleeding, *January*, **45**
monocytic, and polyarteritis nodosa, *January*, **35**
Levodopa
withdrawal, and neuroleptic malignant syndrome: correspondence, **701**
withdrawal syndrome, identical to neuroleptic malignant syndrome, *January*, **59**
Lipoid pneumonia, caused by oily nose drops. *March*, **193**
*Liposarcoma, primary, of heart. *July*, **669**
*Lithium therapy
asymptomatic Graves' disease during. *April*, **295**

asymptomatic Graves' disease during: correspondence. *December*, **1159**
Liver
angiosarcoma, caused by arsenical preparations. *March*, **193**
disease, chronic, and diabetes mellitus, development in long term chelated β thalassaemia. *September*, **831**
secondaries, review. *June*, **433**
Lumbar puncture
and subarachnoid haemorrhage: hospital practice. *November*, **1021**
use in district general hospital: hospital practice. *April*, **1986**
*Lupus anticoagulant, transient, and Fansidar therapy. *September*, **893**
Lymphoma
of colon and rectum; review article. *July*, **615**
intestinal, intussusception in, role of colonoscopy. *December*, **1139**
non-Hodgkin's, association with glomerulonephritis. *December*, **1141**
protein losing enteropathy as sole manifestation. *May*, **399**
and sarcoidosis, association: correspondence. *August*, **809**
T-cell lymphoblastic, of uterus, complicated by *Chlamydia trachomatis* pneumonia. *January*, **55**

*Mc-Vay repair, femoral vein occlusion following. *April*, **301**
Magnesium, and vitamin D resistance: correspondence. *March*, **239**
*Malaria, cerebral, and hypoglycaemia. *May*, **401**
*Mefenamic acid-induced bullous pemphigoid. *January*, **67**
*Megacystis, in DIDMOAD syndrome. *September*, **859**
*Megaloblastic anaemia, due to sulphasalazine, responding to drug withdrawal alone. *April*, **307**
*Megaureter, in DIDMOAD syndrome. *September*, **859**
Melanoma, malignant, involving small bowel. *May*, **355**
*Meningioma, following cranial irradiation. *August*, **741**
Meningism, following *Salmonella virchow* food poisoning. *July*, **621**
*Meningitis
caused by *Streptococcus suis* type II. *August*, **743**
group B streptococcal, in a diabetic adult. *October*, **933**
recurrent sterile, caused by a pituitary abscess. *October*, **929**
Menstrual cycle, propranolol pharmacokinetics during, *December*, **1093**
*Meprobamate, and reversible agranulocytosis. *June*, **499**
*Mesenchymal hamartoma of liver, report of unusual case. *August*, **757**
Metyrapone, long term, in successful control of Cushing's disease in the elderly. *August*, **727**
*Minimal change nephropathy, associated with bronchus carcinoma. *March*, **213**
Mitral valve
in hypertrophic cardiomyopathy, echocardiographic approach. *June*, **563**
prolapse, and internal carotid artery occlusion. *December*, **1121**
Monoamine oxidase inhibitor, inducing Parkinsonism. *March*, **235**
Mono-amines and pteridines, relevance to neurological damage. *February*, **113**
*Mucormycosis, pulmonary, and pneumonectomy, complicating Behçet's disease. *June*, **485**
*Multilocular cyst, kidney. *September*, **877**
*Multiple sclerosis, and paroxysmal atrial fibrillation. *May*, **385**
Muscle
blood flow, effects of atenolol, sotalol and labetalol, comparison. *September*, **841**
dynamics, in hypertrophic cardiomyopathy. *June*, **545**
*Muscular pseudohypertrophy, generalized, in cysticercosis. *April*. **299**
*Myasthenia gravis during pregnancy, thymectomy. *June*, **473**
Mycobacteria, opportunist, and pulmonary infection, Merseyside, 1974–1983. *May*, **363**
Mycobacterium bovis*, causing tuberculous meningitis, report of two cases. *July*, **653
*Myelomatosis, multiple, unusual cause of small bowel intussusception. *November*, **1043**
*Myocardial
hypertrophy, fibrosis, and infarction following exposure of heart to radiation for Hodgkin's disease. *November*, **1055**
infarction, prediction of spontaneous coronary reperfusion. *November*, **1007**
relationship of arrhythmias to walking activity during mobilization after. *April*, **255**
risk, and stress at work. *August*, **791**
Myocarditis
serial cardiac function tests. *June*, **577**
viral, morphological progression. *June*, **581**
*Myositis, focal, and elevated creatine kinase levels, in phaeochromocytoma. *March*, **197**

Nadolol, effect on cardiac dysrhythmias. *March*, **175**
*Naftidrofuryl-induced acute hepatic necrosis. *April*, **309**
Nasogastric suction, postoperative. *June*, **439**
*Nephrotic syndrome
and multiple pulmonary nodules, sarcoidosis presenting as. *December*, **1147**
renal vein thrombosis with recurrent pulmonary emboli, use of Greenfield filter. *March*, **223**
*Neuritis, bilateral brachial, and Bell's palsy, in infectious mononucleosis. *December*, **1129**
Neurobrucellosis: leading article. *December*, **1077**
Neurofibroma, and goitre: diagnostic images. *June*, **463**
*Neuroleptic malignant syndrome
levodopa withdrawal syndrome identical to. *January*, **59**: correspondence. *July*, **201**
successfully treated with amantidine: correspondence. *August*, **809**
Neurological
damage, relevance of pteridines and mono-amines. *February*, **113**
function, role of vitamin E. *February*, **107**
Neutrophil function – I, assessment: review article. *November*, **997**: II. Laboratory tests of neutrophil function: review article. *December*, **1089**
*Nifedipine treatment, and rupture of cerebral aneurysm. *November*, **1029**

Nocardia asteroides osteomyelitis. *July*, **673**
*Nodular fasciitis, induced by epidural injection. *September*, **881**
*Non-Hodgkin's lymphoma
association with glomerulonephritis. *December*, **1141**
protein losing enteropathy as sole manifestation. *May*, **399**
Non-steroidal anti-inflammatory drugs
gastrointestinal tract: at our mother's knee – an occasional review. *January*, **23**
causing colitis. *August*, **773**

Obesity in childhood: review. *February*, **87**
Obstruction
true, to left ventricular flow, in muscular (hypertrophic) subaortic stenosis. *June*, **531**
unimportant in pathophysiology of hypertrophic cardiomyopathy. *June*, **515**
see also Hypertrophic cardiomyopathy
Oculomucocutaneous syndrome, mimicking Behçet's syndrome, chronic granulomatous disease. *June*, **489**
*Oesophagus
recurrent sub-mucosal dissection, in association with achalasia. *October*, **955**
stricture, benign, intramural pseudodiverticulosis as unusual cause. *March*, **201**

Sarcoidosis
associated with ulcerative colitis. *May*, **341**
cause of steroid responsive total alopecia. *March*, **205**
causing hypercalcaemia, corrected with bisphosphonate treatment. *October*, **937**
and Crohn's colitis. *October*, **951**
First Italian Congress on: conference report. *April*, **313**
and lymphoma, association: correspondence, *August*, **809**
presenting as multiple pulmonary nodules and nephrotic syndrome. *December*, **1147**
*Scleroderma renal crisis, successful treatment with enalapril. *November*, **1059**
*Self poisoning
severe, with sodium valproate, survival after. *May*, **409**
with xylenol, fatal. *May*, **411**
*Sensorineural deafness, new complication of ulcerative colitis. *August*, **753**
*Septicaemia and pleural effusion, due to *Plesiomonas shigelloides*. *July*, **663**
*Short PR intervals and tachyarrhythmias, in Fabry's disease. *April*, **285**: correspondence. *October*, **969**
*Sick sinus syndrome, aggravated by carbamazepine therapy for epilepsy. *June*, **497**
Silk Route disease: leading article. *March*, **151**
*Skin necrosis following Haemaccel. *September*, **889**
Sleep, and biological depression: hypothesis. *March*, **179**
Small bowel, and malignant melanoma. *May*, **355**
*Small cell carcinoma of the lung, and lactic acidosis. *April*, **297**
Social relationships, influence on aging and development of cardiovascular disease, a review. *August*, **805**
*Sodium
sulphate, intravenous, in treatment of immobilization hypercalcaemia due to low bone formation. *May*, **395**
valproate, severe self-poisoning with, survival after. *May*, **409**
Sotalol, effect on muscle blood flow. *September*, **841**
*Splenectomy, portal vein thrombosis following, ultrasound diagnosis. *December*, **1153**
Splenectomy, review. *June*, **429**
*Splenic rupture, spontaneous, in polyarteritis nodosa. *October*, **965**
*Spondyloepiphyseal dysplasia tarda, X-linked, dermal basement membranes and collagen fibrils, previously unreported abnormalities. *October*, **943**
*Stevens-Johnson syndrome, following Fansidar therapy, and transient lupus anticoagulant. *September*, **893**
Streptococcus suis* type II, causing meningitis. *August*, **743
Stress
as a cause of heart attacks. *July*, **683.**
and heart disease, evidence of associations between unemployment and heart disease from the OPCS Longitudinal Study. *August*, **797**
job questionnaire, and effects of smoking, diet and obesity, physical activity. *July*, **695**
leading to coronary heart disease, mechanisms. *July*, **687**
mechanisms, in hypertension. *July*, **697**
at work, and myocardial infarction at risk. *August*, **791**
Stroke, prognostic value of blood glucose and glycosylated haemoglobin, *January*, **7**
*Subarachnoid haemorrhage
chronic hypernatraemia and hypothermia following. *June*, **467**
and lumbar puncture: hospital practice. *November*, **1021**
Subphrenic abscess, pseudo-splenomegaly as result: physical signs, *January*, **29**
*Sulphasalazine
causing megaloblastic anaemia, recovery following drug withdrawal alone. *April*, **307**
hepatotoxicity, acute. *April*, **305**
Surgery, general, 1985, review. *June*, **427**
*Syringomyelia, occult, idiopathic periodic hypothermia and bizarre behaviour. *April*, **289**
*Systemic
lupus erythematosus, complicated by acute polyradiculoneuropathy. *April*, **291**
sclerosis, eryofibrinogenaemia and acute gangrene in. *October*, **935**
vasculitides, aetiology and pathogenesis: mechanisms of disease. *July*, **627**

*T-cell lymphoblastic lymphoma of uterus, complicated by *Chlamydia trachomatis* pneumonia, *January*, **55**
*Tachyarrhythmias
and short PR intervals, in Fabry's disease. *April*, **285**
and short PR intervals, in Fabry's disease: correspondence. *October*, **969**
Temporal arteritis, facial swelling sensation, predictor for development of visual disturbance. *November*, **1019**
Teratogenic inborn errors of metabolism. *February*, **125**
Testicular torsion, review of surgical treatment. *June*, **435**
Testis, impalpable, use of laparoscopy. *June*, **435**
Thalassaemia, β, long term chelated, and development of

diabetes mellitus and chronic liver disease. *September*, **831**
*Thiazide-induced hypokalaemia, and hypertension, transient atrial fibrillation in. *December*, **1125**
*Thymectomy, in myasthenia gravis during pregnancy. *June*, **473**
*Thyroglossal cyst, giant lateral, papillary carcinoma in. *September*, **849**
*Thyroid
disease, autoimmune, with ulcerative colitis. *June*, **475**
gland antibodies, and thyrotrophin receptor, in thyrotoxicosis, African and Indian. *September*, **837**
hormone metabolism, and amiodarone: review article. *October*, **909**
metastatic follicular carcinoma, presenting with thyrotoxic induced impaired control of diabetes mellitus. *March*, **199**
nodule, cold solitary, osseous choristoma presenting as. *November*, **1035**
swelling, unilateral, due to actinomycosis. *September*, **847**
*Thyroiditis, subacute, associated with *Chlamydia psittaci* infection, *January*, **33**
Thyrotoxicosis, African and Indian, thyroid gland antibodies and thyrotrophin receptor. *September*, **837**
Thyrotrophin augmentation after commencing thyroxine replacement in primary hypothyroidism, *January*, **11**
secretion, impaired, following administration of thyrotrophin-releasing hormone, in type II diabetes mellitus. *June*, **445**
*Thyroxine
-binding antibody, causing primary hypothyroidism with paradoxically elevated plasma thyroxine. *September*, **845**
replacement in primary hypothyroidism, thyrotrophin augmentation after, *January*, **11**
Training in child health, for developing world. *February*, **147**
*Transient atrial fibrillation, in hypertensive patients with thiazide-induced hypokalaemia. *December*, **1125**
*Transitional cell carcinoma, in an ileal conduit. *August*, **769**
Transcendental meditation, hormonal and biochemical responses: correspondence. *January*, **69**
Tripotassium dicitrato bismuthate, twice daily, in treatment for duodenal ulceration, *January*, **19**
*Tuberculosis
and obstruction of third part of duodenum. *September*, **879**
and renal transplantation, observations from an endemic area of tuberculosis. *May*, **359**
*Tuberculous meningitis, due to *Mycobacterium bovis*, report of two cases. *July*, **653**
*Twins, monozygotic, and Crohn's disease. *November*, **1047**
Type A behaviour
can and should it be changed. *August*, **785**
evaluation. *August*, **781**
*Tysonitis, gonococcal, case report, treatment with oral tetracycline. *September*, **869**
